# CHArt
COMPUTERS AND THE HISTORY OF ART

CHArt 2005 CONFERENCE

THEORY AND PRACTICE

CHArt TWENTY-FIRST ANNUAL CONFERENCE - Thursday 10 - Friday 11 November 2005
THE BRITISH ACADEMY, 10 CARLTON HOUSE TERRACE, LONDON, SW1Y 5AH.

AHRC ICT METHODS NETWORK BURSARY AWARDS

Simone Gristwood, *Lancaster University*, AHRC ICT Methods Network Student Bursary Winner.

I had previously been aware of CHArt and the annual conferences; however I was never able to attend as I could not afford to do this. I was informed about the AHRC ICT Methods Network Bursary through an email forwarded to me by another research student, and having just commenced my PhD research, it provided me with a great opportunity.

CHArt is particularly relevant to my research, both from the point of view of my knowledge of computer art history gained through my MA, and my PhD research relating to computational intelligence and art history.

It was very useful for me to have the opportunity to speak to academics and practitioners as, in addition to learning about their particular fields and backgrounds, they were a further source of motivation for me in this early stage of my research. It was also interesting to note the different styles and ways in which professionals presented their research findings which I may be able to draw upon in the course of my research and beyond.
